

Grating for Water Window

NTT-AT release a 3600 lines/mm high-resolution grating in water window region as a new standard for spectroscopy.

- | | |
|--------------------------|-------------------------|
| - Grooves : 3600 line/mm | - β_1 : 82.04 deg |
| - Size : 40x70x12 | - β_2 : 77.41 deg |
| - α : 86 deg | - WL: 2 – 6 nm |
| - r : 564 mm | - L : 47.0 mm |
| - r' : 563.2 mm | - Coating: Au |
