Over 1,000 Companies Now Using NTT-AT's RPA Software

NTT Advanced Technology Corporation

The number of companies using NTT-AT's RPA Software, offered by NTT Advanced Technology Corporation (hereinafter: NTT-At, head office: Kawasaki city, Kanagawa prefecture, President & CEO: George Kimura), has reached the mark of 1,000 enterprises.

NTT-AT has been selling RPA Software matching the workflow of Japanese enterprises, as a purely domestic product since 2014.
NTT-AT's RPA Software can be installed on even just 1 PC to perform automatic scenario base processing of routine tasks on various Windows based software without any major changes to the existing system.

The introduction record at the beginning of fiscal 2017 was 85 companies. But in response to current trends to reform working systems, over 900 new companies introduced this product over the past year, bringing the total to exceed 1,000 companies at this time. Companies introducing this product are from a wide variety of industries, mainly in IT, manufacturing, distribution and retailing.

In the future NTT-AT aims to be "the field-friendly No. 1 RPA", and we would like to help more customers reform their work systems and improve work efficiency.
