

High-speed solid-state Laser beam deflector

- ✓ “All solid-state”, “Opto-electronic” deflector without moving parts
- ✓ Compact size and wide operable wavelength range: 488 – 3,500 nm
- ✓ Applications : Microscope, Laser processing, Lidar, etc.

1D KTN deflector module & Driver amplifier

Specifications of 1D deflector			
Wavelength (nm)	488 - 635	1235 - 1385	1475 - 1625
Deflection angle (mrad)	150	120	120
Operation frequency (kHz)		10 - 100	
Beam diameter (mm)		0.5	
Dimension (mm)	23 × 23 × 50		

Hand-held 2D KTN deflector module

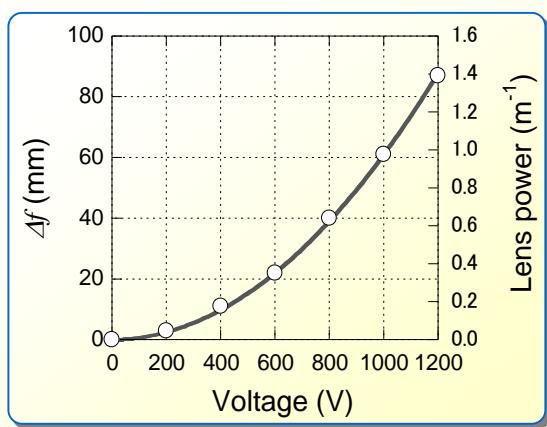

Specifications of 2D deflector	
Wavelength (nm)	1235 - 1385
Deflection angle (mrad)	120
Operation frequency (Hz)	100 – 2000
Beam diameter (mm)	0.8
Dimension (mm)	16 × 16 × 114
Weight (g)	60

KTN varifocal lens

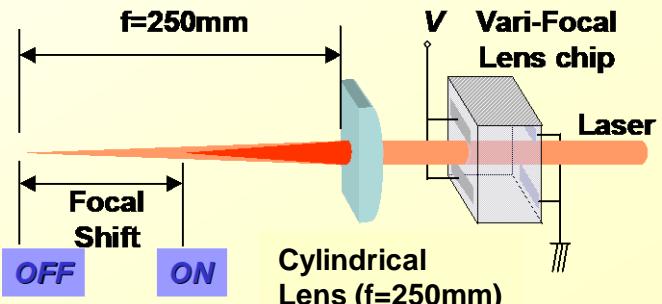

- ✓ All solid state, electro-optic varifocal lens
- ✓ Voltage-controlled continuous and step change of focal length
- ✓ 1 micro second response

Varifocal lens module

Focal shift results

Varifocal lens was developed by NTT device innovation center.
