OPTIPOP CS Cleaner Notice of Discontinuation

Dear Valued Customer,

Thank you very much for your continued patronage of our products.

This letter serves as a formal notification that NTT Advanced Technology Corporation is discontinuing the OPTIPOP CS card type spare cleaner of OPTIPOP C which was discontinued in 2019. While we regret this action since it arises from our own situations, the sales will end when all the stock has been sold.

Please consider using our reel type cleaners, CLETOP series and OPTI POP series which can clean more than 400 times, as a cleaning tool for optical connector plugs. In addition, there are NEOCLEAN-E series and NEOCLEAN-EZ series that can clean not only the optical connector plug but also the optical connector inside the device (the adapter).

We would like to request that you circulate this guidance to any affected departments within your company that may need to be contacted with this information. We are truly sorry for any inconvenience this may cause.

Best Regards.

Memo

(1) Affected Cleaners

OPTIPOP CS (Model: ATC-CS-01)

(2) Time period for termination of sales

As inventory

lasts (estimated to finish approximately the end of March, 2022[※])

※ Please note that sales termination may be earlier, depending on the status of orders.
