

The NEOCLEAN-E1 attachment has become easier to use.

NEOCLEAN-E1  
Compatible Connectors: MU, LC (PC/APC)  
Number of Cleanings: More than 750 times

Due to the rotation during cleaning, the string for preventing the attachment from falling may have become wrapped around the cleaner body.

We improved the cap and workability by making it possible to rotate this part as well.

Please try out the easier to use new attachment for the NEOCLEAN-E1!  
Samples have been prepared so please ask a sales representative.  
The new products will be shipped in sequence, beginning from June.  
Attachments for NEOCLEAN-E2, E3 and NEOCLEAN-EZ are being planned.
